# Putnam Money Market Fund

Pursuing income while preserving capital with short-term investments since 1976

**Capital preservation**

The fund invests in highly rated money market instruments to maintain a stable net asset value (NAV) and protect investors' wealth.

**Attractive income**

The portfolio managers use credit research to select a diverse portfolio of securities that offer above-average yields.

**Leading research**

The managers, supported by Putnam's fixed-income research division, manage risk by analyzing individual securities and overall market conditions.

The Lipper Money Market Funds Average is an arithmetic average of the total return of all Lipper Money Market Funds. You cannot invest directly in an index.

**Weighted average maturity** is a dollar-weighted average measure of the maturity of a fund's portfolio securities, which takes into account maturity shortening provisions, such as the date of an instrument's next interest-rate reset date and/or tender dates.

Not all share classes are available on all platforms.

**Consider these risks before investing:** The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions; geopolitical events or changes; and factors related to a specific issuer, geography, industry, or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. You can lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, there is no guarantee it will do so. The fund may impose a fee upon the sale of your shares or may temporarily suspend your ability to sell shares if the fund's liquidity falls below certain required minimums because of market conditions or other factors. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time. The values of money market investments usually rise and fall in response to changes in interest rates. Interest-rate risk is generally lowest for investments with short maturities (a significant part of the fund's investments). Although the fund only buys high-quality investments, investments backed by a letter of credit have the risk that the provider of the letter of credit will not be able to fulfill its obligations to the issuer. The effects of inflation may erode the value of your investment over time. Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could have a negative effect on the fund.
