Putnam Strategic Intermediate Municipal Fund

A greater focus on absolute return than a more traditional municipal fund

Opportunistic strategy

Pursuing opportunities across the municipal market, the fund seeks to provide attractive income and returns with a focus on capital preservation.

An intermediate fund with more latitude

The fund has flexibility to respond to market opportunities and changes in the shape and slope of the municipal yield curve.

Opportunistic credit investing

While favoring investment-grade bonds, the fund can invest across the entire municipal landscape, including high-yield bonds, to leverage Putnam's deep municipal credit research expertise.

Sector weightings

Health care	22.0%
Education	11.6
Special tax	10.1
State debt	8.6

AA	20.5
A	45.7
BBB	20.6
BB	1.2
Not rated	2.1
Cash and net other assets	4.5

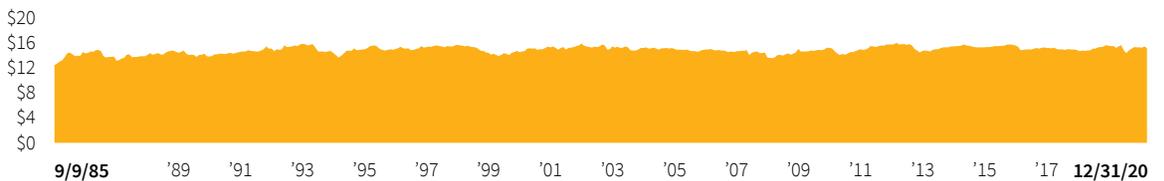

The fund invests 92.2% of its assets in investment-grade tax-exempt bonds.

Allocations will vary over time. Due to rounding, percentages may not equal 100%.

Credit qualities are shown as a percentage of the fund's net assets. A bond rated BBB or higher (SP-3 or higher, for short-term debt) is considered investment grade. This chart reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Ratings may vary over time. Cash and net other assets, if any, represent the market value weights of cash, derivatives, and short-term securities in the portfolio.

The fund itself has not been rated by an independent rating agency.

Protecting investors' principal, the fund's net asset value has remained stable

† Assumes a maximum 40.80% federal tax rate inclusive of the 3.80% Medicare surtax.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class R6 shares assumes reinvestment of distributions and does not account for taxes. Class R6 shares, available to qualified employee-benefit plans only, are sold without an initial sales charge and have no CDSC. Performance for class R6 shares prior to their inception is derived from the historical performance of class Y shares (inception 1/2/08), and has not been adjusted for the lower investor servicing fees applicable to class R6 shares; had it, returns would have been higher. The Bloomberg Barclays 3-15 Year Blend Municipal Bond Index is an unmanaged index comprised of investment-grade municipal securities ranging from 2 and 17 years in maturity. The Bloomberg Barclays Municipal Bond - Bloomberg Barclays 3-15 Year Blend Municipal Bond Linked Benchmark represents performance of the Bloomberg Barclays Municipal Bond Index from inception date of the fund, September 9, 1985, through August 27, 2020 and performance of the Bloomberg Barclays 3-15 Year Municipal Bond Index from August 28, 2020, and thereafter. You cannot invest directly in an index.

The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads. Putnam Strategic Intermediate Municipal Fund received 4, 4, and 4 stars for the 3-, 5-, and 10-year periods among 249, 223, and 164 Muni National Interm funds, respectively.

Morningstar rankings for class R6 shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Morningstar. Morningstar rankings may differ significantly from Morningstar's risk-adjusted star ratings. Past performance is not indicative of future results.

Average effective maturity depends on the maturity of the underlying bonds within each fund. The longer the maturity, the greater the interest-rate risk. **Average stated maturity** is determined based on the legal final maturity of a bond. **Duration to worst** is the duration of a bond computed assuming the bond is called at the worst possible time and uses the date associated with the lowest yield. Depending on the interest-rate environment and structure of the bond, there may be scenarios in which the worst possible time for the bond to be paid off is the maturity date. **Option adjusted duration** is the modified duration of a bond after adjusting for any embedded optionality.

Tax-free funds may not be suitable for IRAs and other non-taxable accounts.

Not all share classes are available on all platforms.

Consider these risks before investing: Capital gains, if any, are taxable for federal and, in most cases, state purposes. Income from federally tax-exempt funds may be subject to state and local taxes. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Interest-rate risk is generally greater for longer-term bonds, and credit risk is generally greater for below-investment-grade bonds. Unlike bonds, funds that invest in bonds have fees and expenses. The fund may invest significantly in particular segments of the tax-exempt debt market, making it more vulnerable to fluctuations in the values of the securities it holds than a fund that invests more broadly. Interest the fund receives might be taxable. The value of investments in the fund's portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political, or financial market conditions; investor sentiment and market perceptions; government actions, geopolitical events or changes, and factors related to a specific issuer, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund's portfolio holdings. Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund's other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.
