Putnam Short-Term Municipal Income Fund

A national portfolio of short-term municipal bonds seeking tax-free income with lower interest-rate sensitivity

Tax-advantaged income

Pursues income free from federal income tax with a portfolio of municipal bonds selected from many states and market sectors.

Focus on total return

Seeks to offer a competitive yield and the potential for price appreciation while striving to protect investors' capital through prudent security selection and active risk management.

High-quality, short-term portfolio

The national portfolio features a range of high-quality, short-term bonds that seek to provide tax-free income with lower interest-rate sensitivity.

Fund description

The fund offers investors a national portfolio of short-term municipal bonds (maturities of under 3 years on average) that help provide high current income exempt from federal income tax (but that may be subject to the federal alternative minimum tax).

The fund's managers will combine fundamental research and risk management to construct a portfolio that generally will seek a high rate of tax-free income with less volatility than longer-maturity.

Sector weightings

Health care	16.6%
Education	10.6
Transportation	10.3
State debt	10.2
Local debt	8.8
Utilities	8.0
Housing	6.1
Prerefunded	5.4
Other sectors	20.8
Cash and net other assets	3.1

Allocations will vary over time. Due to rounding, percentages may not equal 100%.

AAA	6.7%
AA	21.7
A	38.2
BBB	25.3
BB	2.0
CCC and below	0.1
Not rated	2.9
Cash and net other assets	3.1

The fund invests 91.9% of its assets in investment-grade tax-exempt bonds.

Credit qualities are shown as a percentage of the fund's net assets. A bond rated BBB or higher (SP-3 or higher, for short-term debt) is considered investment grade. This chart reflects the highest security rating provided by one or more of Standard & Poor's, Moody's, and Fitch. Ratings may vary over time. Cash and net other assets, if any, represent the market value weights of cash, derivatives, and short-term securities in the portfolio. **The fund itself has not been rated by an independent rating agency.**

† Assumes a maximum 40.80% federal tax rate inclusive of the 3.80% Medicare surtax.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. Share price, principal value, and return will vary, and you may have a gain or a loss when you sell your shares. Performance of class R6 shares assumes reinvestment of distributions and does not account for taxes. Class R6 shares, available to qualified employee-benefit plans only, are sold without an initial sales charge and have no CDSC. Performance for class R6 shares prior to their inception is derived from the historical performance of class Y shares (inception 3/18/13), and has not been adjusted for the lower investor servicing fees applicable to class R6 shares; had it, returns would have been higher. Neither Bloomberg nor Barclays approves or endorses this material, or guarantees the accuracy or completeness of any information herein, or makes any warranty, express or limited, as to the results to be obtained therefrom, and to the maximum extent allowed by law, neither shall have any liability or responsibility for injury or damages arising in connection therewith. You cannot invest directly in an index.

Morningstar rankings for class R6 shares are based on total return without sales charge relative to all share classes of funds with similar objectives as determined by Morningstar. Morningstar rankings may differ significantly from Morningstar’s risk-adjusted star ratings. Past performance is not indicative of future results.

Average effective maturity depends on the maturity of the underlying bonds within each fund. The longer the maturity, the greater the interest-rate risk. **Average stated maturity** is determined based on the legal final maturity of a bond. **Duration to worst** is the duration of a bond computed assuming the bond is called at the worst possible time and uses the date associated with the lowest yield. Depending on the interest-rate environment and structure of the bond, there may be scenarios in which the worst possible time for the bond to be paid off is the maturity date. **Option adjusted duration** is the modified duration of a bond after adjusting for any embedded optionality.

Tax-free funds may not be suitable for IRAs and other non-taxable accounts.

Not all share classes are available on all platforms.

Consider these risks before investing. The value of investments in the fund’s portfolio may fall or fail to rise over extended periods of time for a variety of reasons, including general economic, political or financial market conditions, investor sentiment and market perceptions, government actions, geopolitical events or changes, and factors related to a specific issuer, geography, industry or sector. These and other factors may lead to increased volatility and reduced liquidity in the fund’s portfolio holdings. Bond investments are subject to interest-rate risk (the risk of bond prices falling if interest rates rise) and credit risk (the risk of an issuer defaulting on interest or principal payments). Interest-rate risk is greater for longer-term bonds, and credit risk is greater for below-investment-grade bonds. Interest the fund receives might be taxable. Unlike bonds, funds that invest in bonds have fees and expenses. Tax-exempt bonds may be issued under the Internal Revenue Code only by limited types of issuers for limited types of projects. As a result, the fund’s investments may be focused in certain market segments and be more vulnerable to fluctuations in the values of the securities it holds than a more broadly invested fund. Capital gains, if any, are taxed at the federal and, in most cases, state levels. For some investors, investment income may be subject to the federal alternative minimum tax. Our investment techniques, analyses, and judgments may not produce the outcome we intend. The investments we select for the fund may not perform as well as other securities that we do not select for the fund. We, or the fund’s other service providers, may experience disruptions or operating errors that could have a negative effect on the fund. You can lose money by investing in the fund.
